I think Den said that we did have it. I stayed late to download the data from the ESC site but I have not looked at it. (Laptop at home, in class still in Philly getting ready for the SPCC inspection in Telford).

I probably will look at the data Sunday and definitely Monday - the issue also is that most likely they have not sampled for specific things they might not want to find (like glycols).

I am going to call Rich on my drive up to the inspection to find out what is going on with his review. I emailed him yesterday and told him that I would back him up on this issue and help out as needed (but hopefully stay in the background since I have my own problems!).

No. I find it difficult to follow some things on the Blackberry (on laptop right now for the Dimock stuff).

Do we have pre-drilling data for Dimock? Would be useful since single points post-drilling are less useful, as you know from Bradford.

Hmmm mmmm - maybe not.

Hey! Did you know that they found Glycol in the Pavillion WY investigation!? It may be our indicator for the Dimmock water.
